

# Manage your devices on any operating system through a single portal with **IBM MaaS360**

## Mobile, Tablet, Laptop or PCS – Apple, Android or Windows MaaS360 supports them all.

Take the hassle out of managing your companies' mobile devices with MaaS360 from Pescado. This single platform gives you the ability to configure and protect your smartphones and tablets all from a single screen.

In just a few clicks, administrators can start enrolling devices and quickly manage the entire device lifecycle from enrolment to integration, configuration management, monitoring and security, support, and analytics and reporting. Centralised management provides the administrator with the ability to enrol devices, set policies, distribute apps and support users remotely, freeing up time whilst giving increased cost control. As an administrator you can even choose which tasks to automate, allowing you to save even more time.

### Key Benefits

Your business data is kept safe at all times

Cost saving through increased usage control

Scalable solution with no expensive set up costs

Provision, protect and manage your devices from a single console

Quickly configure email, calendar, contracts, Wi-Fi and VPN profiles

Control how and what devices can access your networkcontrol

### Multiple OS Support from One Console

#### Apple MDM Security

Whether using iPhones, iPads, Macs, or a combination of the three, MaaS360 gives you and your employees the power to embrace these endpoints securely and productively, no matter the use case.

#### Android MDM Security

IBM MaaS360 works closely with Google to protect devices using the Android OS beyond their native capabilities, giving end-users everything they require without sacrificing security.

#### Windows MDM Security

From the latest devices running Windows 10 to Windows 7 legacy PCs, MaaS360 gives you one console to level the playing field of policies that keep all of these and your corporate data safe.

## Rapidly enrol mobile devices

MaaS360 Mobile Device Management streamlines the platform set up and device enrolment process to simplify life for IT and employees.

- Select MDM services and configure device enrolment settings
- Send enrolment requests over-the-air (OTA) using SMS, email, or a custom URL
- Authenticate against Active Directory/LDAP, using a one-time passcode, or with SAML
- Create and distribute customized acceptable-use policies and EULAs
- Register corporate and employee owned bring your own devices (BYOD)
- Initiate individual or bulk device enrolments
- Apply or modify default device policy settings

## Integrate mobile devices with enterprise systems

Through the MaaS360 Cloud Extender, enterprise system integration is easy and straightforward, without the need for on-premises servers or network reconfigurations.

- Instant discovery of devices accessing enterprise systems
- Integrate with Microsoft Exchange, Lotus Notes, Microsoft Office 365 and Gmail
- Build on existing Active Directory/LDAP and Certificate Authorities
- Manage BlackBerry Enterprise Server (BES) policies
- Connect with other operational systems through robust web APIs

## Centrally manage mobile devices

MaaS360 provides a unified mobile device management console for smartphones and tablets with centralized policy and control across multiple platforms.

- Configure email, calendar, contacts, Wi-Fi and VPN profiles over-the-air (OTA)
- Approve or quarantine new mobile devices on the network
- Create custom groups for granular management
- Distribute and manage public and corporate applications
- Safely share and update documents and content
- Define role-based administrative portal access rights within MaaS360 Mobile Device Management
- Decommission devices by removing corporate data and MDM control

## Proactively safeguard mobile devices

MaaS360 Mobile Device Management provides dynamic, robust security and compliance management capabilities to continuously monitor devices and take action.

- Require passcode policies with configurable quality, length, and duration
- Enforce encryption and password visibility settings
- Set device restrictions on features, applications, iCloud, and content ratings
- Detect and restrict jailbroken and rooted devices
- Remotely locate, lock and wipe lost or stolen devices
- Selectively wipe corporate data leaving personal data intact
- Implement near real-time compliance rules with automated actions
- Enable geo-fencing rules to enforce location-based compliance

## Streamline MDM support

MaaS360 Mobile Device Management delivers the ability to diagnose and resolve device, user or application issues continuously from a web-based portal; offering IT detailed visibility and control, and facilitating optimum mobile user productivity.

- Access device views to diagnose and resolve issues
- Locate lost or stolen devices
- Reset forgotten passcodes
- Send messages to devices
- Update ion settings on demand
- Help users help themselves with a self-service portal

## Monitor and report on mobile devices

Mobility Intelligence™ dashboards deliver an interactive, graphical summary of your mobile device management operations and compliance allowing IT to report on demand across the entire enterprise.

- Detailed hardware and software inventory reports
- Configuration and vulnerability details
- Integrated smart search capabilities across virtually any attribute
- Customizable watch lists to track and receive alerts
- BYOD privacy settings block collection of personally identifiable information
- Optional mobile expense management for continuous data usage monitoring and alerting
